TEST FRONT DEV - Veepee Ad

Integration of an event onepage site made up of 10 destinations.

Please note, the destinations below will not be illustrated by a single image but by a slider made up of 3 images (images of your choice):

- Laguna Beach Hotel & Spa = slider
- Impiana Resort Samui = slider
- Grand Arc Hanzomon = slider

- The slider must be controlled by left / right arrows positioned inside the image.

- The "JOIN EMIRATES | THE LIST" is a " sticky"(fixed) block, pasted at the bottom of the page and which goes all over the content of the site.

- You don't have to develop the filter system (destination), we'll discuss about it, technically, during a live interview.

We will take a great interest in the quality of your integration, in order to improve the final render, you can also propose any other functions and/or animations.

Assets provided:

- mobile and desktop design (png)
- Pictures of the destinations
- Font (ttf)
- Json

Needed :

- Rigor and quality of integration
- Use of a CSS preprocessor (SASS)
- Responsive
- Creation of sliders (js)
- Rendering of the test on Gitlab

Bonus :

- Animated page elements (CSS / JS)
